

## Classroom Case Study

### PROFILE

Pelham Road Elementary is a K-5 public school serving 772 students and is part of Greenville County Schools. The district is located in Greenville, South Carolina and is the largest in the state with over 75,000 students across 106 education centers.

**Caroline Duncan, Project Lead**  
Kindergarten Teacher  
Pelham Road Elementary

Caroline Duncan is a kindergarten teacher with more than 10 years of instructional experience and a master's degree in education.

**“Students get tired of hearing me all the time. Walkabouts offer a different mode of teaching!”**

**– Caroline Duncan**

### Kindergarten Teacher Eases Workload While Keeping Student-Centered Planning Front and Center

#### Challenge

Based on research and what stimulates the brain and activates learning, elementary school educators are looking for ways to keep their students engaged and moving throughout the day. District administrators at Greenville County Schools found a solution in the Walkabouts Platform, a web-based learning solution for pre-K to fifth grade students that integrates movement with academic content.

#### Solution

When Duncan received notice of district-wide implementation of the Walkabouts Platform, she was thrilled to use it with her students. With limited time to master new technology tools, it was key that the solution was easy to use and quick to implement. Within a few clicks, Duncan can search, select, and use a standards-based Walkabouts lesson in her classroom.

#### Outcomes

Duncan uses Walkabouts lessons with her students at least once per week and has found the platform is especially useful on rainy and cold days. Duncan saves instructional time with Walksheets (worksheets with a movement component) that allow her to find creative ways to reinforce her lessons without creating new materials herself.

The Walkabouts Platform, a web-based kinesthetic learning solution for pre-K to 5th grade students, boosts engagement and retention through short, movement-rich lessons that activate the elementary curriculum.
