

## Classroom Case Study

### PROFILE

Dillsburg Elementary is a public school in Northern York County, Pennsylvania, and serves approximately 450 students from kindergarten to fifth grade.

**Carly Kleckner**

Kindergarten to Second-Grade  
Virtual Teacher

Carly Kleckner is a kindergarten to second-grade virtual teacher in York County, PA, with seven years of instructional experience.

**“Go for it! I haven’t found any downside to using the program at all. Because of the spread of the curriculum that the Walkabouts Platform touches on and the standards it covers, it can be used every day, if not multiple times a day. You’re going to get your money’s worth out of it, absolutely.”**

### Virtual Teacher Keeps Students Moving

#### Challenge

Carly Kleckner began using Walkabouts lessons during the initial stages of the COVID-19 pandemic to keep her students engaged with the required curriculum while in front of a screen. Like other districts across the country, Northern York County School District offered a remote learning option for students during the 2021-2022 school year.

#### Solution

While searching for resources to support her remote learning students, Kleckner came across the Walkabouts Platform. She immediately put it to use with her students, noting that its ease-of-use required almost no learning curve. Kleckner uses the Walkabouts Platform’s standards-based lessons to support all of her students by meeting them at their learning levels.

#### Outcomes

Kleckner’s remote learners love working together to complete Walkabouts lessons, and she uses also the platform to assess students’ progress. She notes that the platform is an efficient way to teach standards-based content while providing much-needed engagement and movement opportunities for students. “I feel like that’s a big piece of the platform. . . that it does the activity piece and the curriculum piece and the formative assessment piece. It’s a really cool resource that I would love to see more people using.”

The Walkabouts Platform, a web-based kinesthetic learning solution for pre-K to 5th grade students, boosts engagement and retention through short, movement-rich lessons that activate the elementary curriculum.
