Project Leads
First Grade Teachers
Geiger Elementary

“Students seem more engaged and in a better mood after completing a Walkabout.”

“Walkabouts energize children. When children get up and out of their seats, start laughing and having so much fun they don’t realize they are also learning — it’s amazing!”

– Kielle Moore and Tierra Perkins

Keeping Kids Actively Engaged During Hybrid Learning

Challenge

Finding ways to keep younger students actively engaged in learning was a priority for leaders in Fairfield County School District. First grade teachers Kielle Moore and Tierra Perkins were excited when the district announced a new resource for their Title I school. The district chose Walkabouts, a flexible, web-based platform, to keep students moving and learning. When the COVID-19 pandemic caused schools to move to either fully remote or hybrid learning, teachers at Geiger Elementary had an easy solution for reinforcing key learning concepts across language arts, math, and reading.

Solution

With the pivot to hybrid learning, teachers at Geiger Elementary were tasked with simultaneously teaching students in the classroom and those at home. For brain breaks, some teachers used GoNoodle. To provide active learning opportunities, Kielle Moore and Tierra Perkins chose Walkabouts. With Walkabouts, they could quickly find a language arts, reading, or math lesson, then share their screens with students and complete a Walkabout as a class.

The Walkabouts platform, an on-demand, online platform for pre-K to 5th grade students, activates elementary curriculum with short, movement-rich lessons.

Outcome

At a time when students needed it most, Walkabouts provided a fun, engaging learning experience. Each Walkabout also includes built-in progress checkers so students can self-check whether they understand a concept. This helps teachers easily identify gaps in understanding.
