Geiger Elementary

**“Students seem more engaged and in a better mood after completing a Walkabout.”**

**“Walkabouts energize children. When children get up and out of their seats, start laughing and having so much fun they don’t realize they are also learning — it’s amazing!”**

**– Kielle Moore and Tierra Perkins**

### Keeping Kids Actively Engaged During Hybrid Learning

#### Challenge

Finding ways to keep younger students actively engaged in learning was a priority for leaders in Fairfield County School District. First-grade teachers Kielle Moore and Tierra Perkins were excited when the district announced a new resource for their Title I school. The district chose the Walkabouts Platform with its flexible, web-based lessons, to keep students moving and learning. When the COVID-19 pandemic caused schools to move to either fully remote or hybrid learning, teachers at Geiger Elementary had an easy solution for reinforcing key learning concepts.

#### Solution

With the pivot to hybrid learning, teachers at Geiger Elementary were tasked with simultaneously teaching students in the classroom and those at home. To provide active learning opportunities, Kielle Moore and Tierra Perkins chose Walkabouts lessons. With these lessons, they could quickly find a language arts, reading, or math lesson, share their screens with students, and complete a Walkabout as a whole class.

The Walkabouts Platform, a web-based kinesthetic learning solution for pre-K to 5th grade students, boosts engagement and retention through short, movement-rich lessons that activate the elementary curriculum.

### Outcome

At a time when students needed it most, the Walkabouts Platform provided a fun, engaging learning experience. Each Walkabouts lesson also includes built-in progress checkers so students can self-check whether they understand a concept. This helps teachers easily identify gaps in understanding.
